## HOW TO CODE

- Push and hold the blue "Door Code" button on the opener.
- Press the desired remote button for 2 seconds.
- Release and pause for 2 seconds.
- Press the desired remote button for 2 seconds.
- Release the "Door Code" button.
- Test operation.

## HOW TO ERASE CODED REMOTES

In order to erase a coded remote from an opener, simply follow the above process and recode the remote into the opener. In order to erase ALL coded remotes from an opener:

- Turn the power off to the opener.
- Press and hold "Door Code" button.
- Turn the power on again, while still holding the button. The opener will light up to indicate that all memory has been erased.
- Release the button.
- Test operation.
